

URGNet DATA TIER

COMBINE AND MANAGE INVENTORY FROM MULTIPLE LOCATIONS AND OTHER YARDS TO SHOW AS YOUR OWN DATA WHEN COMPETING ON ESTIMATES.

FEATURES

- Combine your own multi-location inventory as one local inventory when displaying data in CCC ONE.
- Show other brokering yard's data as your own - no limit on how close they are to you.
- Configure by part type, percent or dollar markup with minimum and maximum values.
- No duplicate parts shown for main yard versus tier yard if in same area.
- Special logic in place for tier parts based off grade.
- HotKey to allow your salesmen to see tier parts and prices.

DATA TIER SET UP

STEP BY STEP INSTRUCTIONS

Go to www.urgsalessupport.com and sign in (found on left hand side).

To set up the tier settings, click on the 'URGNet Tier Settings' tab on the left hand side. In order for a yard to be listed under Tier 1' or 'List of Partners not on a Tier' a URGNet data agreement must be signed by both yards and returned to URG by email to support@u-r-g.com or fax at 303-367-4409.

This document can be obtained by contacting URG. Once URG receives the document, the yard will be added to the list of recyclers.

Once a URGNet data agreement is returned, you can add yards by dragging the company from 'List of Partners not on a Tier' to 'Tier 1' (Local Partners are for multi-locations yards. If you have multiple locations, you would put your other locations under this tier. An agreement is not required for this.)

After the yard is in the correct spot, you can drag and place the yard(s) in ranking order so the parts will show accordingly. It will tier the data in the order of yards you have selected. The next step will be seeing your part level markups for each recycler. Depending on whether you want the markups to be the same for all tier yards (this is called default markups) or individually per yard (custom markups) you will follow the below steps:

- 1 To set your default markups for all yards, toggle the 'set default markups for 'tier 1' next to 'tier 1'.

TIER 1

Set default Markups for Tier 1 ☒

1 URGTEST YARD [AZ99]
CENTENNIAL, CO 80112

Del. Days ▾ No markups required ▾ ⚙

2 TEST UNITED RECYCLERS GROUP [ZZ99]
CENTENNIAL, CO 80112

Del. Days ▾ No markups required ▾

SET UP INSTRUCTIONS CONTD.

- Once you have completed step 1, make sure to click the green 'Save tier settings below'. The site will refresh and a gear will show up next to where you toggled. Select the gear to set your markups.

ACCESSORY HOLDERS	Flat ▾	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	Save Markup

You can set them by either a percentage markup or a flat markup. You can do this individually by part type or for all part types at once. Be sure to click 'save all part types' once you have finished. Once you go back to the 'tier settings page' next to the yard, you will see a drop down box where you will select 'default mrakups' repeat for each yard.

SET UP INSTRUCTIONS CONTD.

Once you have setup all your recyclers for data tier you are done. You can always log in and modify the settings as much as you need. The changes take effect on the following days data feed.

Copy settings from one data feed company to another:

If you would like to copy settings for one data feed company to another data feed company you can click the company name under "URGNet Tier Settings" on the left hand side of the Control Center screen. Then at the top in red you will see "Copy settings from this partner". You can select the company and then select "go" and it will copy all of the recyclers you have setup with their markups to the current company.

URG data feed to CCC settings:

- 1) Currently only 5 yards can be tiered and they must be outside a 200 miles radius of your facility.
- 2) If the recycler has an A grade part in stock than only his parts will be sent for that specific part and interchange not the tier partners.
- 3) If the recycler has no A grade parts but has a B grade part than only A grade parts from the tier partners will be sent with a limit of 3 tier parts per part and interchange.
- 4) If the recycler has no A or B grade parts in stock than both A and B grade parts from the tier partners will be sent with the highest grades being sent first and a limit of 3 tier parts per part and interchange.
